

# BIG BIKE EUROPE WELCOMES - KB PERFORMANCE PISTONS

MANUFACTURED in North America by United Engine and Machine of Carson City, NV, the parent company of KB Pistons has been in the business of making pistons since 1922. UEM builds specialized skirt-cutting machines in-house, machines that give KB pistons their extremely accurate taper and barrel skirt profiles.

KB say they are the only piston manufacturer offering both CAST 390 Hypereutectic material and FORGED 4032 alloy pistons for Harley-Davidsons, for models from 1941 to the present in both stock replacement and high-performance/boosted applications.

A favorite choice for performance and reliability with leading v-twin engine builders, racers and tuners the world over, KB Performance Pistons are among many US vendors who have chosen Big Bike Europe for their European exhibition debut, although they have been distributing to Europe for many years through the top distributor warehouses in Europe.

International sales specialist Marko Glush says that "we are excited by the opportunity that Big Bike Europe represents for our company.

"This is a wonderful opportunity for us to support our international distributors and reach out to the dealers who sell our parts, and to the riders who are looking for top-class performance and engine reliability. We know that our race-bred products are popular with tech-savvy European dealers and riders, and we are looking forward to being able to further 'spread-the-word' about the KB Performance Piston brand".

With less than a month to go for the first annual Big Bike Europe expo opens its doors (Essen, Germany, May 10th - 12th) advance dealer and custom shop registrations already look set to surpass first year expectations and deliver on the need for the kind of focused and truly international parts, accessory, custom, performance and tuning industry gathering that has been needed for so long.

Industry buyers are registered from more that 30 countries worldwide - including from Russia, the Middle

East, South America, Japan and Australia as well as many of Europe's primary and emerging markets.

Big Bike Europe is the all new host event for the acclaimed AMD World championship of Custom Bike Building (which celebrates its 10th anniversary this year with its first appearance outside of the United States) and host city Essen, Germany, sits at the heart of the largest concentration of v-twin dealers and riders in Europe.
